

We're here for you.

When we heard funeral professionals were last in line for protective gear, we knew we had to step up and get to work.

We immediately realigned all of our resources to launch a company-wide initiative to protect and support you when you need it most.

...And we're using innovation to help. We fired up our dreamLab and worked around the clock to source materials, design, prototype and produce thousands of reusable face shields in-house.

Thank you for doing what you do.
